

PRIVACY NOTICE – What pupil and children’s data is used for

From time to time schools are required to pass on some pupil and children’s data to local authorities, the Department for Children, Schools and Families (DCSF) and to agencies that are prescribed by law. Each of these agencies are data controllers for the information they receive and must only use the data for specific purposes allowed by law. A summary of each of these agencies is included below.

The **Department for Children, Schools and Families (DCSF)** uses information about pupils for research and statistical purposes, to inform, influence and improve education policy and to monitor the performance of the education service as a whole.

Pupil information may be matched with other data sources that the DCSF holds in order to model and monitor pupils’ educational progression; and to provide comprehensive information back to LAs and learning institutions to support their day to day business. The DCSF may also use contact details from these sources to obtain samples for statistical surveys: these surveys may be carried out by research agencies working under contract to the DCSF and participation in such surveys is usually voluntary. The DCSF may also match data from these sources to data obtained from statistical surveys.

Pupil data may also be shared with other Government Departments and Agencies (including the Office for National Statistics) for statistical or research purposes only. In all these cases the matching will require that individualised data is used in the processing operation, but that data will not be processed in such a way that it supports measures or decisions relating to particular individuals or identifies individuals in any results. This data sharing will be approved and controlled by the DCSF’s Chief Statistician.

DCSF may also disclose individual pupil information to independent researchers into the educational achievements of pupils who have a legitimate need for it for their research, but each case will be determined on its merits and subject to the approval of the DCSF’s Chief Statistician. The DCSF’s powers to pass data to researchers are derived from The Education (Individual Pupil Information) (Prescribed Persons) (England) Regulations. These Regulations restrict the researchers who may receive data to ‘persons conducting research into the educational achievements of pupils and who require individual pupil information for that purpose’.

Pupil information is also used for ContactPoint, which is an online directory available to authorised staff that need it to do their jobs, enabling the delivery of coordinated support for children and young people. It is vital to help safeguard children; and to ensure that the right agencies are involved at the right times so children do not slip through the net.

Information about ContactPoint is available at www.dcsf.gov.uk/ecm/contactpoint and the link there to *Information for Young People, Parents and Carers* gives more information on what data is held.

The DCSF is the Data Controller for the purposes of the Data Protection Act.

PRIVACY NOTICE – What pupil and children’s data is used for

Pupils, as data subjects, have certain rights under the Data Protection Act, including a general right of access to personal data held on them, with parents exercising this right on their behalf if they are too young (under 12) to do so themselves. If you wish to access the personal data which DCSF hold about your child, then please contact

Public Communications Unit
Department for Children, Schools and Families

Who does the DCSF pass pupil data to?

The DCSF also passes pupil data to the following third party organisations, as the law allows. A brief description of the purposes the information is used for is set out below, along with a web address if you want to know more about what they do and how to contact them:

The **Department of Health (DH)** uses aggregate information (at school year group level) about pupils' height and weight for research and statistical purposes, to inform, influence and improve health policy and to monitor the performance of the health service as a whole. The DH will base performance management discussions with Strategic Health Authorities on aggregate information about pupils attending schools in the PCT areas to help focus local resources and to deliver the Public Service Agreement target to halt the year on year rise in obesity among children under 11 by 2010, in the context of a broader strategy to tackle obesity in the population as a whole. The DH will also provide aggregate PCT level data to the Healthcare Commission for performance assessment of the health service. www.dh.gov.uk

Ofsted uses information about the progress and performance of pupils to help inspectors evaluate the work of schools, to assist schools in their self-evaluation, and as part of their assessment of the effectiveness of education initiatives and policy. Ofsted also uses information about the views of children and young people, to inform children’s services inspections in local authority areas. Inspection reports do not identify individual pupils. The DCSF will also provide Ofsted with pupil data for use in school inspection. Where relevant, pupil information may also be shared with post-16 learning institutions to minimise the administrative burden on application for a course and to aid the preparation of learning plans. www.ofsted.gov.uk

*In addition to the above, on occasion schools or **Northamptonshire County Council (NCC)** pass pupil and children’s data to the following agencies:*

The **Learning and Skills Council (LSC)** uses information about pupils for statistical purposes, to evaluate and develop education policy and monitor the performance of the education service as a whole. The statistics (including those based on

PRIVACY NOTICE – What pupil and children’s data is used for

information provided by the QCA) are used in such a way that individual pupils cannot be identified from them. On occasion information may be shared with other Government departments or agencies strictly for statistical or research purposes only. The LSC or its partners may wish to contact learners from time to time about courses, or learning opportunities relevant to them. www.lsc.gov.uk

The LSC also administers the Managing Information Across Partners (MIAP) Programme on behalf of the MIAP partnership and is responsible for the development and operation of the **Learner Registration System (LRS)** and also the creation of a learner record in the case of secondary schools.

For pupils of 14 years and over and for pupils registering for post-14 qualifications, the school will pass on certain identification information to the LRS to create and maintain a unique learner number (ULN), and achievement information to the MIAP Service to create and maintain a learner record.

The LRS will enable organisations allowed by law and detailed at www.miap.gov.uk to access the ULN and contain it in their systems, thereby saving individuals having to supply the same information repeatedly to different organisations.

Details of how an individual may opt-out of sharing achievement data in their learner record with those organisations can also be found at www.miap.gov.uk

The **Qualifications and Curriculum Authority (QCA)** uses information about pupils to administer the national curriculum assessments portfolio throughout Key Stages 1-3. This includes both assessments required by statute and those that are optional. The results of these are passed on to DCSF to compile statistics on trends and patterns in levels of achievement. The QCA uses the information to evaluate the effectiveness of the national curriculum and the associated assessment arrangements, and to ensure that these are continually improved. www.qca.org.uk

Primary Care Trusts (PCTs): PCTs use information about pupils for research and statistical purposes, to monitor the performance of local health services and to evaluate and develop them. The statistics are used in such a way that individual pupils cannot be identified from them. Information on the height and weight of individual pupils may however be provided to the child and its parents and this will require the PCTs to maintain details of pupils’ names for this purpose for a period designated by the Department of Health following the weighing and measuring process. PCTs may also provide individual schools and LAs with aggregate information on pupils’ height and weight. www.nhs.uk/pcts

ComPASS: ComPASS, on behalf of the 7 Crime & Disorder Reduction Partnerships (CDRPs) in Northamptonshire uses information for analysis and profiling approximately every six months to identify risk factors that research has found may increase the likelihood of a young person’s involvement in criminal or disorderly/anti-social behaviour. Data aggregated at Lower Super Output Area level is provided, meaning it will not be possible to identify specific individuals from the reports. In the case of Academies, no data will be passed on to ComPASS without authorisation from the school. www.compassunit.com

PRIVACY NOTICE – What pupil and children’s data is used for

Connexions: For pupils of 13 years and over, the school is legally required to pass on certain information to Connexions services providers on request. Connexions is the government's information and advice service for all young people aged 13 to 19 in England This information includes the name and address of the pupil and parent, and any further information relevant to the Connexions services' role.

www.connexions-direct.com

However parents, or the pupils themselves if aged 16 or over, can ask that no information beyond name and address (for pupil and parent) be passed on to Connexions. If as a parent, or as a pupil aged 16 or over, you wish to opt-out and do not want Connexions to receive from the school information beyond name, address and date of birth then please contact the school.

Aimhigher: Aimhigher is the Department for Innovation, Universities and Skills's campaign to encourage young people to consider the benefits and opportunities stemming from Higher Education. Key Stages 2-5 results and pupil characteristics data for pupils in Year 7-14 may be passed on to Aimhigher. In the case of Academies, no data will be passed on to Aimhigher without authorisation from the school. www.aimhigher.ac.uk
